- With its U marking, it enables easy installation of 19" rack type products.

Construction Details

Main profile structure;

Lower and upper chassis and carcass struts; The solid foldable body has a modular structure connected from 8 points with carcass profiles.

Front cover; It is manufactured as a 4mm – 6 mm tempered glass cover.

Side covers; It is made of 1 mm thick DKP sheet metal and is lockable and detachable from the top.

Cable entries; There are cable entry points on the lower and upper chassis.

19" device mounting posts; 1.5 mm thick mounting posts are manufactured from TS 822 pre-galvanized sheet metal.

Paint; Electrostatic powder paint is applied with RAL 7035 color code.

Ventilation; Thanks to our fan and thermostat modules placed on the cabin ceiling, effective ventilation can be achieved with high flow rate and low noise.

Energy unit (PDU); The energy distribution unit can optionally have a plastic or aluminum body, grounded, UPS, fused or a monitorable and manageable structure suitable for mounting in a 19" rack cabinet.

Shipment of the product; After passing through the quality control system, our products are shipped in impact-resistant styrofoam and cardboard packaging.
